---

**Programming:** Java, HTML, CSS, JavaScript, React, Redux, ES6, VBScript

**Databases:** SQL, MongoDB

**Tools:** IntelliJ, Android Studio, GitHub, SQL Server Management Studio, MySQL Workbench, Unified Functional Testing, Application Lifecycle Management

## EXPERIENCE

---

**Front-end Web Developer**, OWLZ Corp, Seattle, WA May 2018-August 2018

- Took the challenge of designing and developing the Front-end stack, with responsive component-based UI layouts using **ReactJS, HTML, CSS3**
- Utilized **Node, NPM** as build/dependency management tools and **JIRA** as bug tracking/program management tool

**Automation Test Engineer**, Maveric Systems Ltd., Chennai, India 2014-2016

- Wrote highly maintainable and reusable Test Scripts using Unified Functional Testing tool
- Designed and improved the automation framework, thereby the execution time of a complex flow Test case was reduced by 30%

## KEY PROJECTS

---

**Compare Prices:** 2018

Developed an interactive web application for comparing prices of products sold online using the **MongoDB, Express, React** and **NodeJS** stack. Implemented functionalities such as Sign in, Sign up, adding/removing a product from wish list, searching a product for price comparison

**Portfolio Site** - <https://manjulaprabhu.github.io/ManjulaPrabhu-Profile/> 2018

Developed a responsive single-page portfolio site using **React** and hosted the site in GitHub pages

**Browse Inventory:** 2017

Led and worked with a team of four members in the development of a browsing inventory module for an Inventory Management System, using **Java** swing & AWT, where File Management was used for data storage and access
